Golden Emblem. One of the most striking of the new roses, and a perpetual bloomer. It is a superb yellow in color, being richer and deeper than Rayon d'Or, and at its best rivals Marechal Niel in shape. The flowers are borne on long, upright stems, well above the glossy, holly-like green foliage, which is of wonderful substance and mildew-proof. Has been awarded several medals for its excellence.

Killarney Brilliant. HT. (A. Dickson & Sons, 1914.) Sport from Killarney. Same growth and style as Killarney and like it, varies considerably in color. In shady weather it is almost deep crimson.
Double White Killarney. HT. (J. A. Budlong & Son Company, 1913.) A pure white sport from White Killarney but has a much larger bud and many more petals than its parent. A great forcing Rose.
Los Angeles. HT. (Howard & Smith, 1916.) Mme. Second Weber X Lyon Rose. One of the finest roses ever introduced. The growth is vigorous, and produces a long-stemmed flower of a luminous flame-pink, toned with coral and shaded with translucent gold at the base of the petals. The buds are long and pointed. Bagatelle Grand Prize Rose.

Lady Ursula. HT. (A. Dickson & Sons, 1908.) Large, well-formed blooms with thick petals of light flesh-pink, without much shading; good fragrance.
La France. HT. (P. Guillot, 1867.) Mme. Victor Verdier X Mme. Bravy. Bright satin-pink with silver reflex. This variety will always be a heavy seller.

Maman Cochet. T. (Cochet, 1892.) Coral-pink, shaded with salmon-yellow, and outer petals splashed rose; large and full, fine to cut.
White Maman Cochet. T. (J. Cook, 1896.) Cream-white, with edges flushed rose. Otherwise same as the Maman Cochet, from which it is a sport.

Hybrid Perpetual

American Beauty. HP. (Bancroft, 1886.) Originally named Mme. Ferdinand Jamin, but was imported by the historian, Bancroft, in 1886, and at his suggestion later introduced as American Beauty by a Washington florist. It is deep pink to soft carmine, with delicate veining of dark red on the broad petals. Under proper care it is a strong grower.

Baroness de Rothschild. HP. Pink.

Captain Christy. HP. (Lacharme, 1873.) Victor Verdier X Safrano. A distinctive rose. Large, full buds; flowers delicate flesh-color, shading deeper toward the center, with prominent veins in the petals.

Clio. HP. (Wm. Paul & Son, 1894.) Silvery flesh, with center shaded clear pink; large, globular. Very fine.

Fisher Holmes. HP. Crimson.

Frau Karl Druschki. HP. (P. Lambert, 1900.) Merville de Lyon X Mme. Caroline Testout. Pure snow-white; long-pointed buds; large, full flowers; free and constant. Not very fragrant.

General Jacqueminot. Crimson. A rich, velvety crimson, changing to scarlet-crimson. A magnificent rose, equally beautiful in the bud state or open. The best known of all Hybrid Perpetuals, and is without a rival in fragrance and richness of color. It is perfectly hardy in most situations.

George Dickson. We might mention several hundred varieties of light-colored roses but there are few good sorts in the very dark shades. George Dickson is one of the few; even more, it is one of the best dark roses in existence. The blooms are as nearly perfect as those of any rose, large, full, and fragrant. The color is deep velvety crimson, almost black on the front of the petals, while the reverse side is heavily and deeply veined with rich crimson-maroon. Never blues, browns or seals.

Georg Arends. HP. (Hinner, 1910.) Frau Karl Druschki X La France. Clear, tender pink; good bud and perfectly formed flowers. Few thorns. A strong grower and in every way worthy.

Heinrich Munch. HP. (Munch & Haufe, 1911.) Frau Karl Druschki X (Mme. Caroline Testout X Mrs. W. J. Grant). Soft pink; very large and full. Vigorous. Took the sweepstakes prizes at the Boskoop Rose Exhibition in June, 1913. It is a true Pink Druschki.

Marshall P. Wilder. HP. (Ellwanger, 1884.) From General Jacqueminot. Deep rich glowing red; extra large, semi-globular, and full. Vigorous and free.

Mme. Plantier. H. Nois. (Plantier, 1835.) An extremely beautiful old white rose that should be in every rose garden. It is a very hardy plant, resisting cold and drought, and a vigorous grower, producing many blooms in early summer.

Paul Neyron. HP. (Levet, 1869.) Victor Verdier X Anna de Diesbach. Deep rose; immense size. Hardy and vigorous.

Prince Camille de Rohan. HP. (E. Verdier, 1861.) Thought to be from Maurice Bernardin X Geant des Batailles. Rich, blackish maroon-crimson; large and full. Vigorous.

Climbers

American Pillar. Mult. The large single flowers are a lovely shade of cherry-pink, with a clear white eye surrounding numerous golden yellow stamens. The canes are of strong, vigorous growth, and bloom abundantly. The foliage is distinct and decorative, and the variety has no superior.

Climbing American Beauty. HW. (Hoopes, Bro. & Thomas Co., 1909.) R. Wichuraiana seedling X American Beauty. Heavy, strong grower, hardy everywhere. Color rich red, passing to crimson. Very popular.

Alida Lovett. HW. (Dr. W. Van Fleet, 1905.) Wichuraiana seedling X Souvenir du President Carnot. Bright shell-pink, with shadings of sulphur at the base of petals. It resembles Dr. W. Van Fleet but is of a much darker color and the foliage is even more beautiful; mildew proof.

Bess Lovett. W. Crimson.

Christine Wright. HW. (Hoopes, Bro. & Thomas Co., 1909.) R. Wichuraiana seedling X Mme. Caroline Testout. Heavy dark green foliage which is immune to disease. Large, full flowers borne singly and in clusters; perfect in form; beautiful in bud and in full expanded flowers; color bright, wild-rose pink. A popular Rose in the east.

Caroline Testout. Cl. HT. Another strong grower with foliage and flowers same as bush, from which it is a sport.

Cl. Duchess of Wellington. HT. (Howard Rose Co., 1924.) Same as bush in every way.

Etoile de France. Cl. HT. (Howard Rose Co., 1916.) Very vigorous. Always in flower throughout the heat of the summer and undoubtedly the best hot-climate climber on the list.

Gruss an Teplitz. Cl. HT. (Storrs & Harrison, 1911.) A perfect sheet of crimson when in bloom. It's the same as the bush Teplitz.

Lady Killingdon. Cl. T. (Hicks, 1917.) We have seen this variety two years in the field and believe it is a vigorous grower and in every way as desirable as the bush.

Mary Wallace. HW. (Dr. W. Van Fleet, 1921.) R. Wichuraiana X Pink Hybrid Teal. Large, glossy foliage; blooming with great freedom in spring and bearing a considerable number of fine buds in summer and fall. Flowers very large, well formed, semi-double, of a bright clear rose-pink, with salmon base.

Cl. Maman Cochet. Cl. T. (Howard Rose Co., 1918.) Another true sport of the bush variety so well known. Fortunately this sport is a strong grower.

Cl. Mme. E. Herriot. HT. (1921.) A vigorous climbing sport of the well known bush variety; flowers produced in great profusion.

Cl. Mrs. Aaron Ward. Cl. HT. (A. Dickson & Sons, 1922.) A climbing sport of this well-known yellow variety. Vigorous and remarkably free blooming. Flowers identical with the bush variety.

Crimson Rambler. P. (Turner, 1893.) Too well known to need description.

Ophelia. HT. Salmon-pink.

Dorothy Perkins. HW. (Perkins, 1902.) R. Wichuraiana X Mme. Gabriel Luizet. Beautiful deep pink flowers. Too well known for further description.

Paul's Scarlet Climber. HW. (Wm. Paul & Son, 1916.) The most brilliant rose known, because of its clear, vivid shining scarlet in large, semi-double flowers which remain unusually long and in good condition on the plants. The flowers never turn blue, but retain their intense coloring until the petals fall. May be used either as an ordinary climber of effective pillars which are a flame of scarlet when in bloom.

Shower of Gold. HW. (Wm. Paul & Son, 1910.) Jersey Beauty X Instituteur Sirdey. Deep golden yellow, very double; free and lasting. Glossy bronze foliage.

Silver Moon. HW. (Dr. W. Van Fleet, 1910.) R. Wichuraiana seedling X R. laevigata. Pure white, with clear yellow stamens; large; free. Glossy bronze-green foliage.

Sunburst. Cl. HT. (Stuart, Low & Co., 1914.) Same as the well-known bush. It is strong, vigorous and quite hardy. Recommend it to your customers every time.

Dr. W. Van Fleet. HW. One of the most important climbing roses. It has a perfectly formed bud which is long and pointed, deep pink in color, and very solid. When fully expanded the outside petals are just faintly suffused pink, gradually deepening to a rich shell-pink center which is high and full. The full-blown flowers measure on an average 4 inches in diameter and are borne on long sturdy stems. The bloom has a pleasing scent, rendering it a valuable cutting rose. In addition to its wonderful profusion in blooming, the large glossy foliage has a great decorative value during the entire season.

Hiawatha. W. Carmine.

Three Eskimo Beauties

PINK WHITE RED
Hybrid Rugosa Roses

(The kind that grow where no others will)
Hybrid Rugosa Roses in which are combined the best qualities of the different rose species.

The Rugosa Rose was introduced from Japan years ago. It is absolutely hardy, with fine thick heavy foliage. By crossing the Rugosa Rose with the best of the double everblooming varieties, a new race has been evolved in which are retained the fine, vigorous growth, the extreme hardiness, the abundant and lasting dark green leaves of the Rugosa type, combined with the size and color of the best everblooming roses.

Eskimo Beauties grow, thrive, and bloom anywhere. They are the ideal cold climate roses. The plants are on their own roots grown from cuttings, no tender top to die back, no foreign roots to sucker; root and top are the same variety.

Eskimo Beauties Rugosa Hybrid Roses are free from mildew, disease and pests that attack other roses.

They will grow in the South and in the Middle West; they will stand the winters of Minnesota and Wisconsin and the Dakotas without protection; in hardness and vigor, they are kindred of the Fir and Spruce. Once planted, they are permanent; no pruning, no spraying, no suckering, nor anything else is needed, just a little manure spaded in the ground and they will last for years and yield an abundance of large, double, fragrant blooms, the only really good dependable roses for cold climates. That is why they are called Eskimo Beauties.
